

WORLD HISTORY

SECTION II

Total Time—1 hour and 40 minutes

Question 1 (Document-Based Question)

Suggested reading and writing time: 1 hour

It is suggested that you spend 15 minutes reading the documents and 45 minutes writing your response.

Note: You may begin writing your response before the reading period is over.

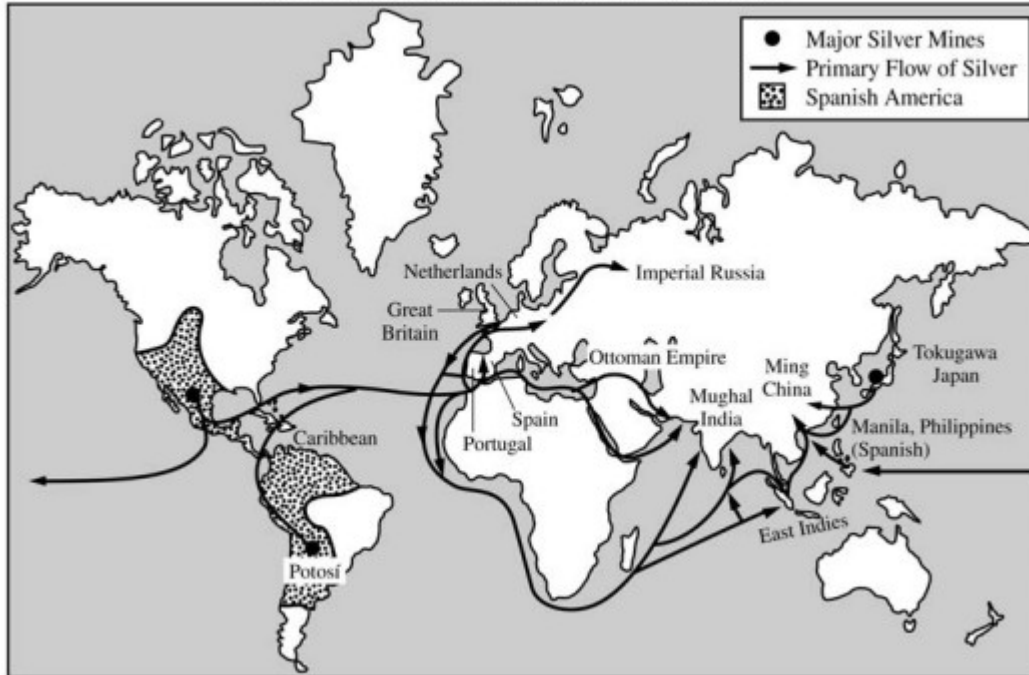

Directions: Question 1 is based on the accompanying documents. The documents have been edited for the purpose of this exercise.

In your response you should do the following.

- Respond to the prompt with a historically defensible thesis or claim that establishes a line of reasoning.
 - Describe a broader historical context relevant to the prompt.
 - Support an argument in response to the prompt using at least six documents.
 - Use at least one additional piece of specific historical evidence (beyond that found in the documents) relevant to an argument about the prompt.
 - For at least three documents, explain how or why the document’s point of view, purpose, historical situation, and/or audience is relevant to an argument.
 - Use evidence to corroborate, qualify, or modify an argument that addresses the prompt.
1. Evaluate the extent to which the global flow of silver from 1500 to 1750CE had social and economic effects on the nations of the world.

Document 1

PRIMARY FLOW OF SILVER, 1570-1750

Document 2

Source: Ralph Fitch, British merchant, an account of his travels to the East Indies, published in 1599.

When the Portuguese go from Macao, the most southern port city in China, to Japan, they carry much white silk, gold, perfume, and porcelain and they bring from Japan nothing but silver. They have a great ship that goes to Japan every year, and brings back more than 600,000 coins' worth of Japanese silver. The Portuguese use this Japanese silver to their great advantage in China. The Portuguese bring from China gold, perfume, silk, copper, porcelain, and many other luxury goods.

Document 3

Source: Wang Xijue, Ming dynasty court official, report to the emperor, 1593.

The venerable elders of my home district explain that the reason grain is cheap despite poor harvests in recent years is due entirely to the scarcity of silver coin. The national government requires silver for taxes but disburses little silver in its expenditures. As the price of grain falls, tillers of the soil receive lower returns on their labors, and thus less land is put into cultivation.

Document 4

Source: Xu Dunqiu Ming, writer, in his essay in *The Changing Times*, about the commercial city of Hangzhou, 1610.

In the past, the dye shops would allow customers to have several dozen pieces of cloth dyed before settling accounts and charging the customers. Moreover, customers could pay for dyeing the cloth with rice, wheat, soybeans, chickens, or other fowl. Now, when you have your cloth dyed you receive a bill, which must be paid with silver obtained from a moneylender.

Document 5

Source: Antonio Vázquez de Espinosa, a Spanish priest, *Compendium and Description of the West Indies*, 1620's.

The ore at Potosí silver mine is very rich black flint, and the excavation so extensive that more than 3,000 Indians worked away hard with picks and hammers, breaking up that flint ore; and when they have filled their little sacks, the poor fellows, loaded down with ore, climb up those ladders or rigging, some like masts and others like cables, and so trying and distressing that even an empty-handed man can hardly get up them.

So huge is the wealth that has been taken out of this range since the year 1545, when it was discovered, up to the present year of 1628, that merely from the registered mines, according to most of the accounts in the Spanish royal records, 326,000,000 silver coins have been taken out.

This does not count the great amount of silver taken secretly from these mines to Spain, paying no 20 percent tax or registry fee, and to other countries outside Spain, including the Philippines and China.

Document 6

Source: He Qiaoyuan, Ming dynasty court official, report to the emperor on the possibility of repealing the 1626 ban on foreign trade, 1630.

The Spanish have silver mountains, which they mint into silver coins. When Chinese merchants trade in Southeast Asia and the Indian Ocean, they trade the goods we produce for the goods of others. But when they go to Luzon (Philippines) they only return with silver coins. Chinese silk yarn worth 100 bars of silver can be sold in the Philippines at a price of 200 to 300 bars of silver there. Moreover, porcelain from the official pottery works as well as sugar and fruit from my native province, are currently desired by the foreigners.

Document 7

Source: Charles D'Avenant, an English scholar, "An Essay on the East-India Trade" regarding the debate on a bill in Parliament to restrict Indian textiles, 1697.

Since we were supplanted in the spice-trade by the Dutch, our chief investments or importations from the East Indies have been in dyed cotton cloth, silks, drugs, cotton-yarn, and wool; part of which commodities are for our own use, but a much greater part, in times of peace, were brought to London for sale to France, Germany, the Netherlands, Spain, Italy, and our colonies.

For Europe draws from Asia nothing of solid use; only materials to supply luxury, and only perishable commodities, but sends to Asia gold and silver, which is there buried and never returns.

But since Europe has tasted of this luxury, since the custom of a hundred years has made Asian spices seem necessary to all degrees of people, since Asian silks are pleasing everywhere to the better sort, and since their dyed cotton cloth is useful wear at home, and in our own colonies, and for the Spaniards in America, it can never be advisable for England to quit this trade, and leave it to any other nation.
